

ARCHITECTURAL DESIGN & ANALYSIS

BURL CRONE

M.Arch

8 years industry experience

Burl designs & analyses with space, with a specialization in classrooms, lecture halls and high-performance technical areas. His work covers the detailed aspects of design with which broader architectural services are not familiar: details of space allocation, the wide portfolio of space usage types and contemporary trends in University space design. His work includes concept design, AutoCAD drafting, basic 3-d work, graphic and web support and the whole range of project administration through construction and post-project analysis.

Burl pioneered the specialty of classroom design at the University of Toronto and combines his own first-hand research of University methods with industry standard norms of space use in academic design. He spent 5 years as the University of Toronto in-house academic space designer after completing his Master of Architecture degree at the same institution.

Sample projects

Mount Royal University Master Plan (Proposal) - 2014
Master Plan consultation (Ryerson University) - 2014
OSM classroom component database & report (physical infrastructure cost and renewal analysis) - 2013
Research and development of classroom design standards, 2008-13
Campus infrastructure wayfinding web map project - 2013
Teaching Station Junior design, production & support - 2012
Victoria College space analysis/consultation - 2012
OISE 3rd & 5th floor re-design, consultation - 2011
UofT Social Work building renovation - 2010
SF1105 Lecture Hall refurbishment - 2014
UTSC & UTM instructional centers - design consultation - 2009
UofT accessibility infrastructure report - 2009

Education

M.Arch (architecture) - University of Toronto
BA Cultural Studies - Trent University
