

## Smoothly Spread Almost Symmetrical 11 / 62 Leap Week Cycle Jitter

Append leap week if the **remainder** of  $(11 \times year + 31) / 62$  is less than 11.

Year (mean year =  $365+^{15}/_{62}$  days =  $365d 5h 48m 23+^{7}/_{31}s = 365.241935483871$  days = mean southward equinoctial year)
