Divide-by-Six 11 / 62 Leap Week Cycle Jitter

Append leap week if year MOD 62 is divisible by 6.

Jitter (days)

Year (mean year = $365+\frac{15}{62}$ days = 365d 5h 48m $23+\frac{7}{31}$s = 365.241935483871 days = mean southward equinoctial year)

Jitter vs. Mean Year

Jitter range ≈ 10.3 = 10+17/62 days
