

Traditional Molad Period = 29 days 12 hours 793 parts = 29 days 12 hours 44 minutes 1 part = 29.53059414 days. Mean Synodic Month (Reingold \& Dershowitz) = 29.53058885 days.
[one part = $31 / 3$ seconds]
Apparent Mean Synodic Month at present $=29.53058752$ solar days $\mathbf{= 0 . 5 7}$ seconds shorter than Molad.
Apparent Mean Synodic Month is getting shorter at the average rate of 0.33 mean solar seconds per 1000 years.
Astronomical Mean Synodic Month (Meeus) = 29 days 12 hours 44 minutes $=\mathbf{2 9 . 5 3 0 5 5 5 5 6}$ days ( 1 part shorter than Molad).
Revised by Dr. Irv Bromberg, University of Toronto, 26 September 2004 <http://individual. utoronto.ca/kalendis/>. Calendar \& astronomy calculations as per "Calendrical Calculations: The Millennium Edition", by Edward Reingold \& Nachum Dershowitz, 2001. Astronomical calculations upgraded per "Astronomical Algorithms", by Jean Meeus, 2nd edition, 1998.
