

Dots above the thick horizontal line at Zero indicate years in which the Molad was/will be after the actual new moon.
 Dots below the thick horizontal line at Zero indicate years in which the Molad was/will be before the actual new moon.

Historical Markers (thick vertical lines), by Hebrew Year: 2448 = Traditional date of Revelation at Mount Sinai.
 4119 = Hillel II fixed the arithmetic Hebrew calendar, using accurate Molad to predict Mean Lunar Conjunctions.
 5765 = The present, mean lunation about 0.6 seconds less than original Molad interval, and getting shorter.
