The page contains a table and a diagram related to Ford Circles for Fixed Arithmetic Leap Sol Cycles. The table lists various time intervals in hours, minutes, and seconds, along with corresponding fractions of sols in excess of 668 sols (to 180 years). Each entry in the table represents a fraction of sols in excess of a certain number of years between leap years. The diagram visualizes these intervals on a plane, with each circle corresponding to a specific time interval and fraction. The page is part of a document by Dr. Irv Bromberg from the University of Toronto, with a URL provided for further exploration: http://www.sym454.org/leap/.
