These cases were compiled from investigations as well as hospital reports and may include suspect as well as probable cases of SARS. Updated:

Current figures from China reflect all confirmed cases of SARS from 1 November 2002. Note the potential inaccuracies due to the reluctance from the Chinese officials to release accurate data.

N.B. The Chinese authorities have reported suspect and probable cases in Guangdong province, but did not officially admit to the presence of SARS until 26/03/2003.
